mechanics of jointed and faulted rock proceedings of the 2nd international conference on the mechanics of jointed and faulted rock mjfr 2 vienna austria 10 14 april 1995 A joint is a break of natural origin in the continuity of either a layer or body of rock that lacks any visible or measurable movement parallel to the surface (plane) of the fracture. Although they can occur singly, they most frequently occur as joint sets and systems. A joint set is a family of parallel, evenly spaced joints that can be identified through mapping and analysis of the ...

mechanics of jointed and faulted rock proceedings of the 2nd international conference on the mechanics of jointed and faulted rock mifr 2 vienna austria 10 14 april 1995 1. Introduction. The Hoek-Brown criterion was derived from the results of research into the brittle failure of intact rock by Hoek (1965) and on model studies of jointed rock mass behaviour by Brown (1970).. The brittle fracture theory published by Griffith (1924), modified by McClintock and Walsh (1962) to account for friction on sliding surfaces, formed the basis for the nonlinear failure ...
